

INSTRUCTIONS FOR USE

1

1: Insert the adjusted leveler in a straight shape Tile gap of 1.5 mm or more than 2 mm

2

2: 90° rotating T-type leveler
Fix it at the point of 2 tiles

3

3: Tighten the adjustment cover clockwise by hand or a wrench to make the two tiles on the same level

4

4: Wait 4-6 hours, take out the leveler when the tile glue is not completely solidified

5

5: Rotate the adjustment cover counterclockwise, and then rotate the T-type leveler by 90° to make it parallel to the tile gap

6

6: Take out the leveler along the edge of the gap, it can be recycled
